Family Medicine – FMP 608

- Recommended:
  Students should choose at least one of the following text books for supplemental reading and to prepare for the written examination. We do not require a single text because each student’s learning style is different. As adult learners, students should review the available resources and choose the one that suits them best. The NBME exam is not based on any specific text. Reading any of these should prepare a student well for the exam.

- Case Files Family Medicine, Third Edition. Eugene C. Toy, Donald Briscoe, Bruce Britton. McGraw-Hill Medical, 2012. 625 pp. (60 Case based chapters on common problems in family medicine, each about eight to twelve pages long with three or four practice questions per case).

- fmCASES: 40 online interactive cases that teach principles of Family Medicine. No practice questions included. 90 day individual subscription costs $50. For more information and registration go to www.med-u.org.

Psychiatry – PSC 608

- Suggested Study Resources and Recommended Text:

Recommended Websites:

- https://www.optumhealtheducation.com/behavioral-health
- http://www.nbme.org
- www.mghcme.org
- www.neiglobal.com
**Pediatrics – PHD 600**
