

MSU COVID-19 Early Detection Program

KEEP OUR COMMUNITY SAFE: WE NEED YOUR SPIT! HELP STOP THE SPREAD OF COVID-19

Throughout the fall 2020 semester, MSU will be analyzing thousands of saliva samples from volunteers to identify cases of COVID-19 in people who are asymptomatic.

BY VOLUNTEERING:

- ✓ You may gain insight into your personal COVID-19 status
- ✓ You'll help health leaders identify and manage potential locations that may become "hot zones" before outbreaks occur
- ✓ You'll take care of your friends and family by helping keep the community safe

INTERESTED? HERE'S HOW IT WORKS:

- Sign up at go.msu.edu/spartan-spit
- Get a text when it's time for you to give your sample
- Pick up a kit from a campus location
- Spit and drop off your sample
- Receive a notification alert with results in 24-36 hours

We're asking all students, faculty and staff who will be in the East Lansing area this fall to volunteer. The more volunteers, the better chance we have at detecting potential outbreaks and stopping the virus from spreading.

It's free and easy!

- To enroll and learn more, visit go.msu.edu/spartan-spit

P.S. Feeling ill? If you're a student, contact the MSU COVID-19 Triage Line at 855-958-2678 or contact your health care provider. If you're a faculty or staff member, contact your primary care provider or check the Michigan Testing Site Finder at michigan.gov/coronavirus. For more information, check out MSU's COVID-19 information page at msu.edu/together-we-will/testing-reporting.
